

EXHIBIT 21-B

- g. When the Adjusted Water Use Capacity as determined in Rule 24 is a positive number, that amount of water shall be deducted from the Jurisdiction's Allocation or Water Entitlement as authorized on the Water Release Form. If additional water is required to meet the Adjusted Water Use Capacity of the Project and the Applicant is unable to reduce the Adjusted Water Use Capacity, the application shall be denied and returned to the Applicant to secure additional water resources.
- h. Intensification of Use allowed by a Water Permit shall result in a deduction from a Jurisdiction's Allocation (for Projects served by the Main California American Water System), from a Water Entitlement available to the property, or from the total available production limit for that Water Distribution System. Each Project which allows new, modified, or Intensified Water Use, shall require a Water Permit.
- i. The General Manager shall not issue a Water Permit which results in the installation of a new water meter that serves water to more than one User. Multiple Users shall apply for separate Water Permits pursuant to this rule. This provision, however, shall not prevent the issuance of a Water Permit which allows a single User to extend incidental water use (e.g. to a single Bar Sink). This provision shall be construed to enable the issuance of a Water Permit required by reason of a change in occupancy or use of an Existing Non-Residential Structure without a requirement to install separate water meters for each separate use or User, provided no substantial structural modifications are necessary to facilitate the changed use. Any such application shall nonetheless be processed in accord with Rule 24 (Calculation of Water Use Capacity and Connection Charges).
- j. When the application involves recordation of notices on the title of the property, all notices shall be recorded by the District prior to final issuance of a Water Permit. Additional information (e.g. trust documents, Articles of Incorporation) may be requested to verify ownership and to facilitate preparation of District notices.
- k. The General Manager shall collect payment of the appropriate Connection Charge and processing fees and shall issue a receipt prior to final issuance of a Water Permit.
- l. When the application requests a Permit to install a new water meter for a fire suppression system, to extend a water main within the boundaries of the Water Distribution System, or to individually meter uses previously metered by one water meter (i.e. meter split), there shall be no processing fee.
- m. The General Manager shall mark the Construction Plans with the District's Water Permit Approval Stamp and shall sign the stamp and include the Water Permit number and date issued.
