Dear Sir/Madam:

MPWMD

I write to you concerning your most recent water bill and its relation to a water leak in the watering system for our yard (account # 1015-210018796765). We expected a large water bill for the previous month because we had just moved in, and the watering system was in the process of being installed. On November 5th we received a service noticed from Rick Saldivar about a leak from one of the Orbit manifold valves next to the house which we were aware of but mistakenly assumed that the leak was small. In any case since that notice we have had a service technician examine our watering system in an effort to find the problem. After several hours of work we think that the leak has been found but I will need to check the meter regularly (daily to weekly) to see if our water usage has gone down. This problem has been very frustrating and expensive, and we still are not sure that the problem has been completely solved. In any case, since we were not aware of the severity of this problem until we received our last bill, and since we are actively engaged in trying to solve the problem, do we possibly qualify for a discount on our latest water bill? Some compensation would be greatly appreciated.

Thank you for your consideration in this matter.

Very truly yours,

Jaurence C. Breaker

P.S. In the future, please address all water bills to me and not to Robin Breaker. She is deceased (6-11-2009)

Dear Brenda Lewis:

I am a long time resident of Seaside so I am very aware of our chronic water shortage.

I am interested in what solutions you would recommend for the future of water here in Monterey County. Specifically, I am wondering if you support public ownership of our water supply. I understand that 80% of the water in the United States is publically owned. It bothers me that Cal Am, a corporate entity with stock holders, profits while we, the rate payers, see our bills going up, rationing in the future and no workable solution to the water problem in site.

I am also wondering what you personally were able to accomplish in your term on the water board and what were your challenges working on the board. Another question I have for you is with regards to desalination, what does this do to our environment, how will it affects our rates and which plan do you support? I look forward to hearing from you.

Sincerely,

Cynthia Witherspoon
