Public Outreach
committee.*

Roger,

Thank you for your comments. As you may know, the District Board authorized creating a community relations liaison position last month and I expect that the District will expand distribution of the weekly summary and other updates to develop community support. I will pass your suggestion on.

Also, note that the Board has scheduled a special workshop on August 25 at 7 pm at the Community Center at Soper Field in Seaside to discuss a Contingency Plan, as recommended by CVA. -- darby

Subject: The weekly report

Darby, I just finished reading the weekly report that was emailed to me. I recently asked to be on the mailing list for the Board packet and this may have triggered the weekly email. I think the report is excellent and I believe that many citizens would be happy to receive this information.

I wonder if you might consider an ad in the Herald, or adding a line to one of the conservation ads that CalAm runs, that would offer interested citizens the opportunity to receive this service. I hope that the District can develop as much support in the community that it will need if the Contingency Plan is required to be implemented.
