**NOTICE of APPROVAL of a Water Distribution System Application**

Today's Date: \_\_\_\_\_  
Date WDS Permit Authorized by Staff: \_\_\_\_\_ Permit # \_\_\_\_\_  
System/Applicant Name: \_\_\_\_\_  
APN: \_\_\_\_\_  
Address/Location: \_\_\_\_\_

Dear Sir or Madam:

As a Neighboring Well owner of a Well located on the parcel(s) referenced above, this notice is written to inform you that a Permit to create or amend a Water Distribution System (WDS) has been approved by the District Engineer of the Monterey Peninsula Water Management District (MPWMD or District), pursuant to Rule 22. This approval is based in part on Findings, supported by evidence, that the new WDS would not adversely affect your Well. District rules require denial if an existing system (Well) would be adversely impacted by the proposed system.

The Staff Determination, hydrogeologic review, Findings of Approval, Conditions of Approval and other documentation supporting the WDS Permit approval are public records and are available for inspection, with the exception of certain protected Well data.

This WDS Permit approval is an "Appealable Decision" and is also posted on the MPWMD website at: <http://www.mpwmd.dst.ca.us/wdd/Appeals/appeals.htm>. If you believe the WDS Permit issuance would result in adverse impacts to your Well, or is not in accordance with MPWMD Rule 22, you have the right to appeal within 21 days of the date of the WDS Permit issuance, pursuant to MPWMD Rule 70. The appeals form is on the "Appeals" link above. The appeal must be based on substantive evidence and not conjecture.

This is the third notification from MPWMD about the subject WDS, in addition to other communications by the Applicant or his/her consultant. Unless you file an appeal, this is the final communication from MPWMD regarding the subject WDS. Thank you for your participation in the WDS Permit process.
