Hutnak Hydrologic Consultant Services Cost Estimate

Task	Task Description	Hours	Rate (\$/hr)	Cost
1	Assemble data sets from Monterey County MPWMD, DWR, and USGS.	30	50	\$1,500
2	Compile comprehensive database of well logs.	40	50	\$2,000
3	Populate database with lithology, pump test, water level, and water chemistry.	180	50	\$9,000
4	Compile water production volumes for wells within study area.	50	50	\$2,500
4	Create geographic database with well locations.	30	50	\$1,500
5	Perform geostatistical analysis of well pump data to identify "hot spots" where low scoring wells exist.	50	50	\$2,500
6	Identify possible monitoring locations in or near "hot spots."	40	50	\$2,000
7	Map outcrops and compile geologic data for areas with low scoring drawdown ratios.	40	50	\$2,000
8	Design monitoring network for fractured rock areas.	50	50	\$2,500
9	Compose letter report summarizing findings and implementation of monitoring network.	20	50	\$1,000
		530		\$26,500
