^{1.} Proposed Table 13 amounts (Col. D) are those established by SWRCB through November 2014. Table 13 amounts in Column D do not include several permit applications still in process with SWRCB that are included in Table 13 amounts shown in Column A.

^{2.} Proposed instantaneous rates include permitted rates and an estimate for future permits based on draft permit.

^{3.} License 11866 (at Los Padres Dam) original amount reduced from 3,030 AFY to 2,179 AFY by Order 95-10. Amount in cfs is presumed to be diverted continuously.

^{4.} Presumed to be a continuous rate of diversion.

^{5.} Face amount in cfs is presumed to be diverted continuously between Nov. 1 - May 31.

^{6.} Table 13 amounts (ex Cal-Am) include riparian pumpers that applied for a Table 13 right. For puposes of this analysis, it is assumed Table 13 rights are exercised instead of riparian rights.

^{7.} The mean of non-Cal-Am Carmel River Basin production for WY 1996-2014 was 2,327 AFY, which is presumed to have been pumped under riparian rights (few Table 13 rights had been permitted by 2011). Riparian pumping is estimated by subtracting Table 13 from non Cal-Am produciton.
