

## APPENDIX G

### RESIDENTIAL AND POPULATION GROWTH POTENTIAL

The following pages summarize residential and population growth potential within the Monterey Peninsula Water Management District. The first five pages show this potential according to each of the five distribution alternatives being analyzed in this EIR. The final six pages do the same for each of the water supply option/baseline production level combinations under which new Cal-Am water will be available. The population growth estimates were calculated by applying the following population per housing unit estimates to the total new housing unit potential after accounting for an assumed five percent vacancy rate.

Carmel-by-the-Sea	1.89
Del Rey Oaks	2.75
City of Monterey	2.32
Pacific Grove	2.15
Sand City	2.17
Seaside	3.10
Monterey County	2.50

These per unit estimates are taken from EIP Associates' *Estimates of Housing and Employment at Buildout within the Monterey Peninsula Water Management District*, July 1988.
