

## PLEASE READ BEFORE SUBMITTING REQUEST for EXEMPTION for a Water Distribution System

A permit from the Monterey Peninsula Water Management District (MPWMD) is needed for any new or amended Water Distribution System (WDS), unless it meets the criteria for an exemption. For MPWMD Rules, please visit [www.mpwmd.net](http://www.mpwmd.net) and click on "R

ules and Regulations" (see Rules 20, 21 and 22).

An exemption means that the system does not need a WDS Permit because it meets one or more of the criteria specified in MPWMD Rule 20-A or 20-C. Examples include:

- Replacement wells or other exemptions listed in Rule 20-C;
- New wells located more than 1,000 feet from the Monterey Peninsula Water Resource System\*\* (MPWRS) and serving fewer than four parcels (e.g., Carmel Valley Upland, Jacks Peak area);
- New wells located 1,000 feet or less from the MPWRS and serving fewer than four parcels, and can demonstrate lack of hydrogeologic connectivity or impact to the MPWRS;
- New Seaside Groundwater Basin wells that produce less than 5.0 acre-feet per year (AFY) and serve only one parcel;
- Natural spring in Fractured Rock that provides non-potable supply for onsite landscape irrigation on one parcel;
- Onsite rainwater collection system serving one parcel (Exemption Request is not required);
- Mobile WDS trucked from a source outside MPWMD for use on 3 or fewer parcels, with documentation showing the supply is lawful (Exemption Request is not needed if less than 55-gallon containers).
