MPWMD HOSTS MAY 19, 2003 QUARTERLY UPDATE ON WATER SUPPLY PROJECT EIR

On Monday, May 19, 2003 from 5:30-6:30 PM, the Monterey Peninsula Water Management District (MPWMD) will host the Spring 2003 public quarterly update on the long-term water supply project Environmental Impact Report (EIR) and related activities. The meeting will be held at the District conference room at 5 Harris Court, Building G, Monterey (Ryan Ranch). District staff and consultants will briefly review recent board action, provide a status report on progress on the EIR and related water supply activities, describe next steps, and identify future opportunities for public involvement. District staff and consultants will then be available to answer questions from the audience in a casual and informal setting.

Following the quarterly update, the public is invited to attend the regularly scheduled MPWMD Board meeting at 7:00 PM at the Seaside Council Chambers, 440 Harcourt Avenue, Seaside.
