

PUBLIC HEARINGS ITEM:

**13. CONSIDER ADDENDUM TO
MITIGATED NEGATIVE DECLARATION
FOR SLEEPY HOLLOW STEELHEAD
REARING FACILITY UPGRADE
INCLUDING ADOPTION OF CEQA
FINDINGS AND MITIGATION MEASURES**

Meeting Date: January 25, 2017

Staff contact: Larry Hampson

Board to consider CEQA actions

- The Board of Directors is acting as an independent body to consider all information in the record including:
 - Initial Study and Draft Mitigated Negative Declaration
 - Written comments from RWQCB and NMFS and responses
 - Mitigation Monitoring and Reporting Plan
 - Any comments received at the January 25, 2017 Public Hearing
 - Proposed Addendum
- Must be able to make a determination that the Project will not have a significant effect on the environment with proposed mitigation measures

Board to consider CEQA analysis

- Potential significant effects:
 - Board previously certified the IS/MND for the project and adopted mitigation measures at the November 14, 2016 meeting
- The effect of the addendum is to correct a technical error in the description of which Distinct Population Segment the Carmel River steelhead belongs
- There is no new and significant information that requires recirculation of the IS/MND
- An Addendum is the appropriate CEQA action

Recommendations

- **Recommendation 1:**
 - Accept written Responses to Comments and address any additional written or oral comments received at the Public Hearing;

- **Recommendation 2:**
 - Adopt CEQA Findings to certify the Addendum;

- **Recommendation 3:**
 - Adopt Resolution 2017-02 certifying the Addendum;

- **Recommendation 4:**
 - Direct staff to amend the Final IS/MND to incorporate the Addendum and file a Notice of Determination of approval of the Addendum.
