## Table XV-3 Regulatory Water Production Limits For California American Water Systems from Carmel River Sources Within the Monterey Peninsula Water Resource System (All Values in Acre-Feet)

Adopted September 21, 2015

| Month    | Monthly<br>Target | Year-to-Date<br>at Month-End Target |
|----------|-------------------|-------------------------------------|
| ctober   | 869               | 869                                 |
| ovember  | 730               | 1,599                               |
| ecember  | 644               | 2,244                               |
| nnuary   | 645               | 2,889                               |
| ebruary  | 605               | 3,494                               |
| larch    | 687               | 4,181                               |
| oril     | 740               | 4,920                               |
| ay       | 899               | 5,820                               |
| ne       | 934               | 6,754                               |
| ıly      | 1,017             | 7,771                               |
| ugust    | 1,002             | 8,773                               |
| eptember | 930               | 9,703                               |
| TAL      | 9,703             |                                     |

## Notes:

Monthly and year-to-date at month-end production targets are based on the annual production limit specified for California American Water (Cal-Am) for Water Year (WY) 2016 from its Carmel River system sources per State Water Resources Control Board Order WR 2009-0060 (9,703 acrefeet). This amount was distributed monthly based on Cal-Am's reported monthly average production for its Main system sources during the WY 2006 through 2013 period. These values incorporate consideration of the triennial reductions specified for the Cal-Am systems in the Seaside Basin adjudication decision, in setting the monthly maximum production targets from each
