David Stoldt, General Manager Monterey Peninsula Water Management District 5 Harris Court, Building G Monterey, CA 93940

Paul Sciuto, General Manager Monterey One Water (formerly Monterey Regional Water Pollution Control Agency) 5 Harris Court, Building D Monterey, CA 93940

RE: Notice of Event of Default by Monterey Peninsula Water Management District and Monterey One Water under Water Purchase Agreement for Pure Water Monterey Project

Dear Messrs, Stoldt and Sciuto:

This letter concerns the Water Purchase Agreement for Pure Water Monterey Project, dated September 19, 2016 (the "WPA"),¹ by and among Monterey Peninsula Water Management District ("District"), Monterey Regional Water Pollution Control Agency, now known as Monterey One Water ("M1W"), and California-American Water Company ("Cal Am"). In accordance with Section 20(c) of the WPA, Cal Am hereby provides notice that an Event of Default by the District and M1W has occurred.

As stated in Section 20(c) of the WPA, failure of the Delivery Start Date to occur on or before July 1, 2019 constitutes an Event of Default. The Delivery Start Date is the date that the District commences delivery of advanced treated recycled water produced by the Project ("AWT Water") to any of the metered points of delivery identified in the WPA. Cal Am, the District and M1W have had several discussions in recent weeks at which time the District and M1W (together, the "Public Agencies") have informed Cal Am that the Public Agencies would not be able to meet their obligations under the WPA with respect to

<sup>&</sup>lt;sup>1</sup> Terms not otherwise defined in this letter have the meaning given in the WPA.

commencing delivery of AWT Water by July 1, 2019. As of the date of this letter, and to the best of Cal Am's knowledge, the Public Agencies have, in fact, not commenced delivery of AWT Water to the metered points of delivery.

The purpose of the WPA is to provide for the sale of advanced treated recycled water from M1W to the District and from the District to Cal Am derived from the Pure Water Monterey groundwater replenishment project owned and operated by M1W (the "Project"), and to serve Cal Am's customers within its service area. While it is disappointing that the Public Agencies were not able to meet their contractual obligations, the Project remains an essential component of the Monterey Peninsula Water Supply Project's water supply portfolio. The 3,500 acre-feet of AWT Water that is to be provided by the Project offers many benefits to Cal Am's customers, including increased diversification of water supply sources and more efficient use of our limited resources.

Under Section 20(d) of the WPA, upon the occurrence of an Event of Default by the District and M1W, Cal Am may terminate the WPA immediately upon written notice to the other parties. To be clear, the WPA affords Cal Am the right, but not the obligation, to terminate the WPA due to occurrence of an Event of Default by the District and M1W. Although an Event of Default has occurred, Cal Am has elected not to exercise its right to terminate the WPA at this time. Instead, Cal Am will continue to monitor the Project's progress as the Public Agencies continue their efforts to achieve the Delivery Start Date. It is important to note that, consistent with Section 29 of the WPA, Cal Am's decision not to terminate the WPA at this time shall in no way constitute a waiver by Cal Am of its ability to exercise its right to terminate the WPA as a result of the Event of Default at any time, and Cal Am hereby expressly reserves its right to do so until such time as the Delivery Start Date has occurred.

Cal Am requests that within 14 days following your receipt of this letter that the Public Agencies provide a written response detailing your plan and proposed timing to achieve the occurrence of the Delivery Start Date. Cal Am looks forward to receiving your written response.

Sincerely,

Richard Svindland

Executive Director: Jim Cullem, P.E.

Re: Dissolution of Water Authority TAC and Appreciation for Service

Dear Dave Stoldt:

Due to fiscal constraints on the Monterey Peninsula Water Authority budget in the new fiscal year, as well as the current legal delays in the review of new water supplies for the Monterey Peninsula, the board of the Water Authority voted on June 27, 2019 to terminate the Technical Advisory Committee (TAC) as a standing committee effective July 1, 2019.

The Authority board would like to extend its sincere appreciation for your service on the TAC over the years. Your input to TAC deliberations and considerations have been invaluable in forming well-considered advice to the board. You can take just pride in having contributed in large measure to the success we have achieved to this point in finally getting one or more new water supplies for our community.

Should technical advice be needed in the future, the Water Authority board retains the option to form a short duration committee effort on an ad-hoc basis. Hopefully you will continue to be available to participate should your input be requested at a later date.

Please note that the Federal Fair Political Practices Commission (FPPC) requires you to complete a "Leaving Office" Form 700 since the TAC is being dissolved. The Water Authority Clerk of the Board, Clementine Bonner Klein, will contact you with details on how to file this required form.

Sincerely,

James M. Cullem P.E. Executive Director

Monterey Peninsula Regional Water Authority

#### MPWMD Board and staff:

During the Measure J Campaign, Cal Am attorneys, Joe Conner and George Soneff, wrote the article below. At the time I was curious about their statement, "In the end, the vast majority of cases do not result in a government takeover, leaving taxpayers holding the bag to pay for litigation expenses that are entirely avoidable."

I contacted Food & Water Watch for some background on this claim. Mary Grant does water research at Food & Water Watch. She sent me the attached list of over 400 successful public water buyouts over the last 25 years. Her note is below.

If you have not seen this, I thought it would be of interest.

On 7/2/18, 9:30 AM, "Mary Grant" < mgrant@fwwatch.org > wrote:

Hi Melodie,

While many eminent domain suits are settled out of court, these settlements result in the public sector buying their water system from the private company. Condemnation is usually used as a stick to force companies to the bargaining table, but then both sides negotiate a final purchase to the public sector.

I can think of only one or two cases where the courts ruled against a public sector on the right to buy -- e.g., Claremont. See the attached article about Claremont. It was notable because it is rare for a city to lose. "In the vast majority of cases, when a public agency exercises eminent domain, the only issue in dispute is the amount of just compensation the agency must pay for the property being acquired. Even in situations where a property owner challenges the agency's right to take, it is typically for procedural reasons that can ultimately be corrected."

I've attached a list of 409 successful purchases by local governments of privately owned water systems. A more recent one is Ojai, California.

Best, Mary

MONTEREY HERALD • June 27, 2018

#### The long and winding road

By Joe Conner and George Soneff

This November, Monterey Peninsula voters will have a chance to vote on whether a study should be done to condemn the local water system, and if the study says it is feasible, to move forward on a contested government takeover of a system that is not for sale.

Between the two of us, we have decades of experience working on just such issues. We think voters are well served by a better understanding of the process and the costs involved.

Should voters approve the measure in November, the Monterey Peninsula Water Management District would then have nine months to conduct a feasibility study. That would take us to August or September of 2019. If the study concludes it is feasible, MPWMD would then pass a resolution of necessity, and file an eminent domain lawsuit against the local water company, Cal Am. The first significant event in the lawsuit would be a lengthy trial about whether the public interest is better served by a government takeover of the Cal Am water system. This is referred to as the "right to take" portion of the case, which is Phase One. That first phase would likely take two or three years, meaning it probably would not be resolved until 2022 or 2023.

Should the government agency not prevail in the "right to take" phase of the trial, it would be obligated to pay all of the utility's litigation expenses, in addition to its own, from its general fund. If MPWMD does prevail, there would then be another trial to determine the value of the water system. This would likely include litigation over the value and necessity of all improvements made between the fall of 2018 and the trial, which in Monterey will likely be in the \$350 million range – with the addition of the desal plant – on top of the existing water system value. The valuation trial preparation and trial would probably take two or more years after the conclusion of Phase One, meaning that the trial court process would be concluded sometime between 2024 and 2026, and possibly even later.

After a jury sets the value of the system and determined other amounts owed for the taking, such as severance damages, if either side is unhappy with that number (which is likely), the appeals process would

then begin. The appeals process will take anywhere from two to five years, depending on how far up the appellate chain the case goes; if the California Supreme Court ultimately decides to consider the case, then a five year long appeals process is a fair time estimate. All the while, both MPWMD and the utility will be paying legal expenses.

In recent attempted government takeovers, the results of this process have not been good for citizens. In the city of Claremont, the city lost in Phase One of the trial. The case took over two years; the city spent \$6.3 million, and was then ordered to pay all of the water utility's litigation expenses, which amounted to \$7.6 million. So, the city's total liability for the failed eminent domain effort was about \$14 million, not counting the thousands of hours of staff time — a staggering loss for the residents of Claremont. The words of Claremont Councilman Sam Pedroza are instructive: "We did everything that we could. A lot of lessons learned — a lot of expensive lessons — but today's decision ends this chapter."

Our collective experience is that proponents of a government takeover low ball the price, sometimes by a factor of 500 percent or so, and also underestimate the time the process takes in order to sway public opinion to support doing a "feasibility" study and starting the condemnation ball rolling. In the end, the vast majority of cases do not result in a government takeover, leaving taxpayers holding the bag to pay for litigation expenses that are entirely avoidable.

While this long drawn out process may be good for the lawyers, it isn't very good for taxpayers. We hope the residents of the Monterey Peninsula will keep this timeline and process in mind as they learn about this issue in the coming months.

Conner and Soneff are lawyers who focus on defending private business and utility owners in condemnation actions. Conner is an attorney with Baker Donelson. George is an attorney with the law firm Manatt, Phelps & Phillips.
