Department of Interior Bureau of Reclamation

Salinas and Carmel Rivers Basin Study MEMORANDUM OF AGREEMENT

The United States Department of Interior, Bureau of Reclamation (Reclamation), the San Luis Obispo County Flood Control and Water Conservation District; Monterey County Water Resources Agency; Monterey Peninsula Water Management District and Monterey Regional Water Pollution Control Agency agree to work collaboratively to perform the Salinas and Carmel Rivers Basin Study (SCRBS) as part of Reclamation's WaterSMART Program. This Memorandum of Agreement (MOA) establishes the terms that will guide the performance of the Study. The SCRBS includes the entire watersheds of both the Salinas and Carmel Rivers.

This MOA is intended to facilitate cooperative efforts for mutual provision of services and support, and technical assistance by the Parties in the conduct of meeting the objectives and scope of this MOA.

I. Purpose

The purpose of the SCRBS is to evaluate existing and potential future imbalances between water supplies and demands in the Salinas and Carmel River Basins and propose a range of strategies which may be employed to alleviate or mitigate identified imbalances. As a collaborative effort between four non-federal Partner agencies who are participating with Reclamation and the U.S. Geological Survey, the SCRBS will include a comprehensive assessment of current supplies and demands, model future water supplies and demands, account for uncertainties in future climate conditions, population growth, and other socioeconomic trends. In response to identified supply and demand imbalances, the SCRBS will evaluate how various strategies may perform over a range of potential future climate and socioeconomic conditions.
