Monthly and year-to-date at month-end production targets are based on the annual production limit specified for the California American Water (Cal-Am) systems for Water Year (WY) 2020 from Carmel River sources per State Water Resources Control Board Order WR 2016-0016 (8,310 acre-feet) and adjusted annual production limits specified for the Cal-Am satellite systems from its Coastal Subarea sources (1,474 acre-feet) and Laguna Seca Subarea sources (0 acre-feet) of the Seaside Groundwater Basin per the Seaside Basin adjudication decision. These values do not include consideration of any carryover credit in the Seaside Basin for WY 2020. This combined total (9,784 acre-feet) was distributed monthly based on Cal-Am's reported monthly average production for its main and satellite systems during the 2013 through 2018 period. For purposes of Rule 163.A.3 and Rule 164.A.3 the annual production limit shall add the expected production from all water supply projects, including Pure Water Monterey and the Sand City Desalination Facility.
