**Subject:** definition of feasibility

January 23, 2019

David Stoldt, General Manager  
Monterey Peninsula Water Management District  
P.O. Box 85  
Monterey, CA 93942-0085

Dear Mr. Stoldt,

I was able to attend the Seaside meeting of the Board's listening tour and want first of all to thank you and the Board for holding this and several other meetings. I did not speak at that meeting because I wanted to listen to others and get a better feel for the concept of "feasibility". I'm glad I waited because my own thoughts gelled afterward.

Although the various measures of feasibility that were listed on the sheets passed out at the meeting are okay as far as they go, I have a different view of feasibility. While some voters may have supported Measure J for any of the reasons you listed, or for other reasons, there is no way for the district to determine how many voters support of the suggested definitions. But what we do know is the over 55% of the voters supported Measure J which is a significant call for public ownership. So, my thought is that the Board should focus on trying to come up with a way to make public ownership feasible.

I'd be happy to clarify or amplify my comments if that would be of assistance to you.

Sincerely,

Renee Franken
