

Agenda Item 10

Report on Fish Rescues for 2020

January 25, 2021

District's Ad Week of January 11th

Water Matters

In the last 30 years, the Monterey Peninsula Water Management District has saved nearly 500,000 steelhead. During the dry season we remove steelhead who get trapped, raise and study them, then release them in the wet season. To learn more about the process follow our social media channels and signup for our newsletter.
