

Ordinance 202 Second Reading

September 28, 2026

David J. Stoldt
General Manager

Ordinance 202 Second Reading

SUMMARY

- **CLEAN UP OUTDATED RULES**
- **MOVE REQUIREMENTS INTO THE RIGHT PLACES**
- **UPDATE RULES TO REFLECT CURRENT PRACTICE**

Ordinance 202 Second Reading

WHY ORDINANCE CLEAN UP?

Make the rulebook easier to maintain

Remove rules that are obsolete, redundant, governed elsewhere, or no longer reflect current practice.

Put requirements where they belong

Move well-monitoring provisions from Rules 80–82 into the existing rules addressing registration, metering, and reporting.

Bring older rules up to date

For example, Rule 101 was last updated in 2006 and is being updated to reflect current circumstances.

Support Strategic Goal #6

Update and prioritize the District's Rules and Regulations.

Ordinance 202 Second Reading

WHAT ORDINANCE 202 CHANGES

10 Rules Deleted	3 Rules Consolidated	10 Rules Updated
Removes obsolete, redundant, or misplaced rules.	Well registration, metering, and reporting requirements are moved from Rules 80–82 into Rules 52, 54, and 56.	Updates current requirements and clarifies existing District practices.
Includes Rules 18, 19, 19.5, 26, 32, 80, 81, 82, 100 & 129.	No requirements are eliminated by this consolidation; provisions are relocated.	Includes Rules 42, 52, 54, 56, 64, 101, 110, 123, 128 & 161.

Ordinance 202 Second Reading

WHAT ORDINANCE 202 DOES NOT DO?

It does not create a major new regulatory program.

It removes outdated provisions, relocates existing requirements, and makes targeted updates and clarifications to bring the Rules & Regulations in line with current District practices.

Ordinance 202 Second Reading

CATEGORIES OF CHANGES FOR ORDINANCE 202

Outdated rules	Several rules address old dates, practices, or matters covered elsewhere.	Delete Rules 18, 19, 19.5, 26, 32, 100, and 129.
Well requirements	Registration, metering, and reporting provisions are spread across multiple rules.	Delete Rules 80–82 and move their provisions into Rules 52, 54, and 56. Update wording and state the applicable penalties.
Water system data	Rule 42 contains older reporting language.	For systems with 50 or more connections, specify annual water use reporting by jurisdiction and customer category, plus production and other data on request. Move the \$500 per day late-response penalty from Rule 161 into Rule 42.

Ordinance 202 Second Reading

CATEGORIES OF CHANGES FOR ORDINANCE 202

Water supply planning

Rule 101 contains older forecasting and response language.

Focus forecasts, operating budgets, and production reports on systems with more than 3,000 connections; update the references to the District's current conservation and rationing rules.

User fees and enforcement

Fee hearing and billing language is separate from current budget practices; Rule 110 is general.

Allow the annual budget hearing to satisfy the Rule 64 fee hearing requirement. Clarify in Rule 110 what charges and penalties the General Manager may bill and collect.

Carmel River work

River activities and the District's limits of responsibility use older wording.

Update descriptions of river management activities and clarify in Rule 128 that the District is not responsible for detecting, preventing, controlling, or mitigating flooding or erosion damage.

WHEN DOES ORDINANCE 202 GO INTO EFFECT & ANY CEQA FINDINGS?

EFFECTIVE DATE

12:01 a.m. — 30 days after adoption at second reading

CEQA FINDINGS

Not subject to CEQA because the ordinance consists of administrative activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment.
